# **Edexcel GCE**

## Core Mathematics C3 Advanced

Wednesday 20 January 2010 – Afternoon

Time: 1 hour 30 minutes

Materials required for examination	Items included with question paper
Mathematical Formulae (Pink or	Nil
Green)	

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

#### **Instructions to Candidates**

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions.

You must write your answer to each question in the space following the question.

When a calculator is used, the answer should be given to an appropriate degree of accuracy.

### **Information for Candidates**

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 9 questions in this question paper. The total mark for this paper is 75.

There are 28 pages in this question paper. Any blank pages are indicated.

#### Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled. You should show sufficient working to make your methods clear to the Examiner. Answers without working may not gain full credit.

**Total** 

advancing learning, changing lives

1.	Express

$$\frac{x+1}{3x^2-3} - \frac{1}{3x+1}$$

	$\frac{x+1}{3x^2-3} - \frac{1}{3x+1}$	
as a single fraction in its sim	plest form.	(4)

2.

$$f(x) = x^3 + 2x^2 - 3x - 11$$

(a) Show that f(x) = 0 can be rearranged as

$$x = \sqrt{\left(\frac{3x+11}{x+2}\right)}, \quad x \neq -2.$$

**(2)** 

The equation f(x) = 0 has one positive root  $\alpha$ .

The iterative formula  $x_{n+1} = \sqrt{\left(\frac{3x_n + 11}{x_n + 2}\right)}$  is used to find an approximation to  $\alpha$ .

- (b) Taking  $x_1 = 0$ , find, to 3 decimal places, the values of  $x_2$ ,  $x_3$  and  $x_4$ .
- (c) Show that  $\alpha = 2.057$  correct to 3 decimal places.

(3)

**(3)** 

3. (a) Express $5\cos x - 3\sin x$ in the form $R\cos(x + \alpha)$ , where $R > 0$ and $0 < \alpha < \frac{1}{2}\pi$ .	(4)
(b) Hence, or otherwise, solve the equation	
$5\cos x - 3\sin x = 4$	
for $0 \le x < 2\pi$ , giving your answers to 2 decimal places.	
for $0 \leqslant x \leqslant 2\pi$ , giving your answers to 2 decimal places.	(5)

4. (i) Given that  $y = \frac{\ln(x^2 + 1)}{x}$ , find  $\frac{dy}{dx}$ .

**(4)** 

(ii) Given that  $x = \tan y$ , show that  $\frac{dy}{dx} = \frac{1}{1+x^2}$ .

**(5)** 

Leave	
blank	

5. Sketch the graph of  $y = \ln |x|$ , stating the coordinates of any points of intersection with the axes.

(3)

Leave blank

6.

Figure 1

Figure 1 shows a sketch of the graph of y = f(x).

The graph intersects the y-axis at the point (0, 1) and the point A(2, 3) is the maximum turning point.

Sketch, on separate axes, the graphs of

- (i) y = f(-x) + 1,
- (ii) y = f(x + 2) + 3,
- (iii) y = 2f(2x).

On each sketch, show the coordinates of the point at which your graph intersects the y-axis and the coordinates of the point to which A is transformed.

**(9)** 

	Leave blank
Question 6 continued	

	Leave blank
Question 6 continued	

7. (a) By writing  $\sec x$  as  $\frac{1}{\cos x}$ , show that  $\frac{d(\sec x)}{dx} = \sec x \tan x$ .

**(3)** 

Given that  $y = e^{2x} \sec 3x$ ,

(b) find  $\frac{dy}{dx}$ .

**(4)** 

The curve with equation  $y = e^{2x} \sec 3x$ ,  $-\frac{\pi}{6} < x < \frac{\pi}{6}$ , has a minimum turning point at (a, b).

(c) Find the values of the constants a and b, giving your answers to 3 significant figures.

**(4)** 

8.	Solve

for $0 \le x \le 180^\circ$ . (7)

- **9.** (i) Find the exact solutions to the equations
  - (a) ln(3x-7) = 5

**(3)** 

(b) 
$$3^x e^{7x+2} = 15$$

**(5)** 

(ii) The functions f and g are defined by

$$f(x) = e^{2x} + 3,$$

$$x \in \mathbb{R}$$

$$g(x) = \ln(x - 1), \qquad x \in \mathbb{R}, \ x > 1$$

$$x \in \mathbb{R}, x > 1$$

(a) Find  $f^{-1}$  and state its domain.

**(4)** 

(b) Find fg and state its range.
